

No
Isolation

Lämmin tekniikka – tuo ihmiset lähemmäksi

**Our mission is to reduce
loneliness and social isolation
through warm technology.**

Pitkäaikaisista sairauksista johtuva sosiaalinen eristyneisyys on ongelma, jolla on merkittäviä koulutuksellisia ja sosiaalisia seurauksia

**AV1 is your eyes, ears
and voice in class on the
days when you cannot be
there yourself**

Suomessa on yli 6000 lasta,
joilla on pitkäaikaissairauksia.

AV1

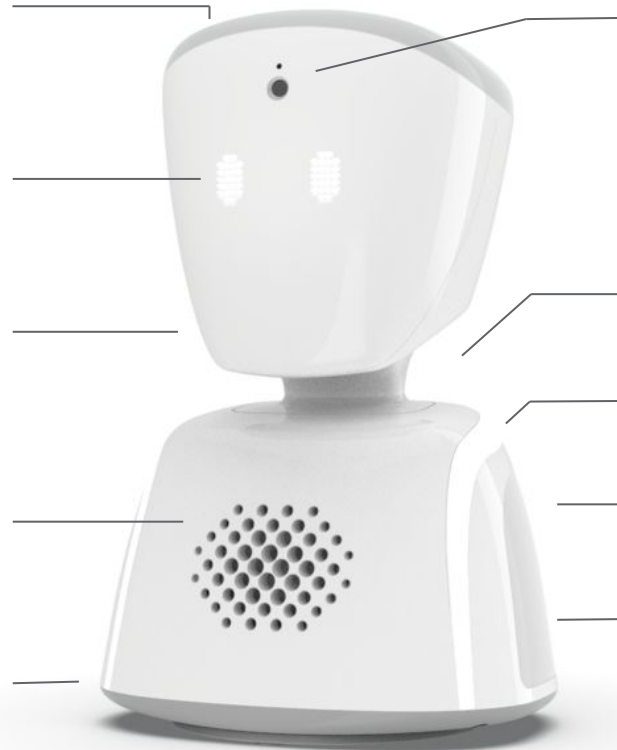

Ylävalot alkavat vilkkua,
kun oppilas viittaa

Käytä silmiä ilmaisemaan
tunteitasi

Robotilla on integroitu 4G,
joten se on aina verkossa

Oppilaan ääni kuuluu
kaiuttimesta

Pohjassa oleva moottori sallii
robotin kääntyä 360 astetta

Mikrofoni ja kamera
suoratoistaa
lähetyksen luokasta

Kaulan moottori sallii pään
kääntyä ylös, alas,
vasemmalle ja oikealle

Valoviiva näyttää jos
AV1 on yhdistetty tai ei

TPE:llä päällystetty takaosa
antaa hyvän otteen

Selässä on laturin kiinnitys,
akun varausnäyttö ja
verkkoyhteyden laadun
näyttö.

A woman with blonde hair, wearing a black cat-eared headband, a red and green short-sleeved dress with yellow trim, and a yellow cape, holds a small white robot. She has a medical sensor on her left arm. The setting is a hospital room with a window, a hanging triangle, and medical equipment in the background.

Bloomberg

***“After just one week with AV1,
my son had attended more classes than
he had been able to all year”***

Emil's (15) mother

Privacy by Design

We have worked tirelessly to ensure that AV1 is secure: both for the children using it and for the pupils and teachers in class. Measurements taken:

- 1 to 1 encrypted video stream
- Always real time streaming: no storage
- One child = one robot
- Password lock to use the app
- No possibilities for screenshots

These efforts have resulted in us being awarded by the National Data Protection Agency in Norway for being “an example to follow” for other companies.

"The cost of using AV1 to access education is much cheaper than one-to-one teaching"

£8
VS
£250

A photograph of a female teacher with dark curly hair, wearing a blue sleeveless top, leaning over a desk to help two young female students. The students are wearing school uniforms (white shirts and blue sweaters). They are looking at a book or paper on the desk. In the background, there are computer monitors and other classroom furniture. A red-to-orange gradient circle is in the top right corner.

5 hours
VS
25 hours

AV1 helps to significantly increase the average number of hours of education a child receives

AV1 works with any diagnosis

Chronic Fatigue/ME

Cancer

Organ failure

Severe anxiety / social anxiety

Autoinflammatory diseases

Severe Asthma/Allergy

Cerebral Palsy

Heart/Lung diseases

Low spectre autism

And many others

**AV1 is often used as the tool to
make school less scary - as a tool to
bring children back.**

You can test AV1 in a free pilot

We are working with Multitronic Pro in Finland to make everything as easy as possible.

If you want to test AV1 in a free pilot, Ben Bergman can help you:

ben.bergman@multitronicpro.fi

www.av1.fi

Kiitos
